

Score At Work: The seating concept that suits all

- The first modular ergonomic chair that can be used throughout the organization; in every workplace, from shop floor to boardroom!
- Dutch Design: One Look & Feel, a timeless design with the utmost comfort
- Conforms to NPR1813, NEN-EN1335 and ANSI/BIFMA X5.1 standards
- All modular components are interchangeable, can be individually replaced and are sustainably developed with a high recycle value
- Highly versatile for the use in offices, at reception desks, in the boardroom, in controlrooms, on production lines, in labs, at cash registers, in home offices, and any other working place where seating comfort is important

Score At Work

Multi-purpose, multi-functional, multi-modular

The Score At Work ergonomic chair is a true revolution in comfortable seating for any workplace. Quality, functionality and durability are seamlessly combined with design: Dutch Design. The completely modular concept of the Score At Work system results in a suitable chair that can be assembled for any workplace. So you can start compiling your chair of choice directly from the countless number of combinations. Components can be easily replaced, so if you desire to replace the seat and backrest, you don't have to purchase a whole new chair. That is true modular convenience, sustainable

and economically responsible! The Score At Work meets the requirements of NPR1813, NEN-EN1335 and ANSI/BIFMA X5.1 standards. Score chairs have a 5 year warranty period (terms and conditions apply).

The Score At Work concept offers multiple benefits, both now and in the future. It is durable, hygienic, creates One Look & Feel at every workplace and, on top of that, is a very smart investment. Above all, the Score At Work is designed to be comfortable.

Score At Work **PU**

Create the right chair for the individual workplace.

Ergonomic, modular, sustainable and economic responsible.

Score At Work Mix & Match

A Score At Work Contact with contemporary Bicolor Trevira fabric with armrests? Or a Score At Work Flowmatic in a sturdy PU design for active sitting on the production floor? Or would you prefer a Score At Work with a high backrest and luxurious Blend upholstery? Whether it should be functional or just look good, the Score At Work can fulfil almost every need. The entire chair can be assembled without tools. Making a choice between wheels, trumpet glides, aluminium base or plastic frame is not a problem at all with the

Score At Work concept. The ergonomically shaped backrest offers good spinal support, while shoulders and arms are able to enjoy freedom of movement. As a result of the modular concept, it is made possible to create a seat that suits the requirements of each individual user.

Available in 3 mechanisms: Contact, Synchromatic or Flowmatic for optimum seating comfort.

Score At Work **Bicolor**

SCORE: Made in Holland for 40 years

Score is the Dutch market leader in ergonomic seating solutions and related accessories. You can find Score products in various workplaces, such as industrial places, offices, hospitals, retail outlets, dental offices, etc. Score's 'Dutch Design' is an international sensation. From the drawing board to production and extensive field testing, the complete development process takes place in-house. That explains Score's sheer power, with the Score R&D team as a unique starting point. They continually pioneer new innovations of which our end users

enjoy the maximum benefits. The revolutionary Score At Work concept originated from a vision where flexible workplace design is the starting point, sustainability is the focus and quality is affordable. In order to guarantee high standards of quality, Score products are exclusively distributed via carefully selected dealers. Score supplies the right seating solution for every workplace, and if we don't already have it, we'll make it for you!

Score At Work **Blend**

Options Score At Work, Mix & Match

Seat and backrest options:

All Bicolor, Blend and PU models can be assembled with a choice between a low or a high backrest. The ergonomic shaped backrest guarantees free movement for arms and shoulders. PU models are only available in one seat size – Bicolor and Blend models are available with a choice between a standard seat or a wide seat.
