

The *Wrepairstation*: The ultimate work companion, always ready to handover your needed instrument

Based on fifteen years of experience in repairing and maintaining small electronics we invented the *Wrepairstation*.

It all started with our own problem: After reorganizing our workbench, shortly thereafter it was messy again. Inquiry showed that colleagues were struggling with the same problem. Some used improvised solutions to organize their workplace, such as using home, garden, and kitchen tools.

Two years ago the frustrations and stress motivated us to work on our mission to manage this problem. And although we have a background as industrial designers, it was not easy to design a station that would keep all the tools in a logical and ergonomic position. It became an even more difficult process when tools and requirements increased.

Inspired by nature we managed to create an overall *Workstation* that is approved for all kinds of electronics repair industries. Based on our own experience and those of our colleagues we considered that the *Wrepairstation* should be useful for a wide target group. Therefore we allowed for modular features meeting personal requirements, such as a heat gun holder, tin dispenser, and expandable plier holder.

The *Wrepairstation* including all optional features has a symmetrical layout, prepared for left and right hand users. The innovative and ergonomic swivel arm can be set easily depending your working angle.

Conclusion:

- The *Wrepairstation* is ESD Safe, eliminating the risk of damaging sensitive electronic components

- The *Wrepairstation* meets the highest standard

A few Advantages of the **Wrepairstation**:

- * Efficient and faster lead time
- * Improving results
- * Reduces chances of losing tools
- * Positive effect
- * Better work overview
- * Ergonomic handling
- * Designed for left and right handed users
- * Prestigious and professional appearance
- * ESD Safe

With this *Wrepairstation* your work is now:

- * More clear
- * More professional
- * Ergonomic
- * Faster
- * More organized
- * More comfortable
- * More satisfying
- * Less stressful

Product Specifications:

- Handmade in the Netherlands
- Full metal housing, solid build
- ESD-Safe
- 5X USB Power port, quick-charge & intelligent charging system.
- Expandable symmetrical features for personal requirements
- Small and compact, lightweight design
- Symmetrical layout for left and right hand users
- Anti-glare, anti-scratch coating application
- Innovative and ergonomic swivel arm
- Turning swivel arm, adjustable visual angle
- Pull towards, or push away swivel arm, adjustable work distance.
- Space for up to 50 tools
- Lifetime warranty*

*Electronic parts 24 months' Warranty
