TECHNICAL SPECIFICATIONS

handle	ESD handle
bits	40 Wiha quality micro bits

TIDY SYSTEM

Thanks to the compact and sturdy storage box with integrated magnetic lock, your Micro Bit Set is always safely stored. The folding mechanism means that each Micro Bit can be removed individually and the labeling enables easy sorting and retrieval of individual Wiha bits – no more mess with your bits. Thanks to the handy design, the bit set is also perfect for on the go.

easy removal of the bits

40 WIHA BITS

The set contains 40 Wiha micro bits in the usual Wiha quality. From TORX® to Phillips to Y-type, the set always has the right micro bit ready for all applications. The magnetic bit holder makes changing Wiha bits easy and tool-free.

magnetic holder for quick bit change

USP

WIHA ESD HANDLE

The high-quality electrostatic dissipative Wiha ESD handle protects against discharge and offers maximum safety for your electrical equipment. The ergonomic handle design and the quick-turn zone enable precise work even on sensitive parts.

protects sensitive components from electrostatic discharge
